"A Higher Standard of Clean!"

Introducing the New EZ-NTC: a mobile cleaning system that combines automatic dispensing technology with our proprietary Multi-Task Concentrates.

NTC: No Touch Cleaning...Cleaning restrooms is a task that nobody enjoys. The Multi-Clean **EZ-NTC** system dispenses properly diluted cleaning products directly to surfaces to be cleaned with minimal or no contact with the contaminated surface. Click [HERE](#) to view the "What's New" section of the Multi-Clean website (active internet connection required).

A Higher Standard of Clean Everyday! The **EZ-NTC** is an everyday cleaning system for restrooms and more! It was designed to replace traditional cleaning that uses spray/squirt bottles and mop buckets. This traditional method often does not leave restrooms truly clean. Take a look at grouted tile floors and you understand what's going on, workers use mops and buckets to move dirt around the floor but do not always remove it. The result is ugly and dirty floors. The **EZ-NTC** is NOT designed or meant to replace renovative, deep cleaning systems that utilize high pressure, vacuum recovery, and blowers. Click [HERE](#) to view a PDF of the **EZ-NTC** literature located on the Multi-Clean website.

EZ means Easy...The **EZ-NTC** utilizes a battery powered pump to dispense properly diluted Multi-Task concentrates at low pressures of 100 psi directly to surfaces to be cleaned. The system lets the powerful Multi-Task products do the work. It does not have vacuum recovery, a blower, or pressure washer capability. That means no contaminated solution to dispose and no cords or hoses to manage, which makes the system simple to use for daily cleaning. A fully charged battery will run 2 hours, long enough to clean 24 small to medium sized restrooms. *Simply fill the tank with water, and go clean.*

Is This Restroom Clean?

A truly clean restroom means cleaning what you can see AND what you can't see. The EZ-NTC makes it easier to effectively clean areas frequently missed by traditional cleaning methods including behind and below toilets, on adjacent wall surfaces, partitions, and below urinals.

A Cost Effective Investment: The **EZ-NTC** is an economical purchase that promises cleaner restrooms and efficient use of cleaning chemicals.

List Price: \$2,250

Part #420615

Accessory Kit ordered separately 420260

Foam Gun ordered separately 420615

A True Green Machine: Accurately and automatically dispensing of chemicals reduces waste. Consistently cleaner restrooms make for a healthier facility. Green Seal and EPA registered cleaning products make the system truly green.

More than Restrooms...The uses of the **EZ-NTC** are only limited by your imagination: cleaning operating rooms, car washing/detailing, spraying dumpsters with odor counteractants and much more.

~~~~~

### **ASK THE CHEMIST**

**Q.** Restroom Cleaning...Is it the chemical, equipment or procedures used that is the most important factor in getting a really clean restroom?

**A.** For the answer, click [HERE](#).
