Multi-Clean's **Certified Floor Care System** provides all the products needed for a complete system of floor care. Using the **Certified Floor Care System** in a Green Cleaning Program can earn points towards LEED®* Certification.

Packaging

Multi-Clean offers convenient packaging that is environmentally responsible.

Description: 5 gallon Bag-In-Box or 1 gallon containers.

1 gallon HDPE containers contain at least 25% recycled content.

5 gallon BIB's use recycleable corrugated cardboard with plastic bags. BIB packaging reduces waste by greater than 90% compared to pails.

Ultra Stripper

Our strongest AND safest stripper. Ultra Stripper liquifies heavy finish buildups quickly for easy removal. It is non-corrosive and has low odor.

5 gallon BIB 903985
1 gallon 903983

Meets GS-40 Requirements

This product meets Green Seal's environmental standard for industrial and institutional floor-care products based on its reduced human and aquatic toxicity and reduced smog production potential.

Clear Essence

A workhorse, low order, zinc free floor finish. Provides a durable, glossy finish that can stand up to burnishing with battery, electric, or propane machines.

5 gallon BIB 904105
1 gallon 904103

Meets GS-40 Requirements

This product meets Green Seal's environmental standard for industrial and institutional floor-care products based on its reduced human and aquatic toxicity and reduced smog production potential.

Century Maintenance

A high performance neutral cleaner.

5 gallon BIB 910575
1 gallon 910573

Meets GS-37 Requirements

This product meets Green Seal's environmental standard for industrial and institutional cleaners based on its reduced human and environmental toxicity and reduced volatile organic compound content.

* LEED is a registered trademark of the U.S. Green Building Council.

An essential part of Green Cleaning is having a documented floor care program that emphasizes scheduled routine maintenance. Use the information below to customize a schedule for a facility.

DUST MOP floor a minimum of two times a day to remove abrasive dirt particles, dust, and debris from the floor.

VACUUM entryway mats.

A Green Cleaning Program requires that entrances be addressed with appropriate maintenance and adequate entrance matting.

CLEAN by scrubbing with Century Maintenance Cleaner (1-2 oz./gal.) using white or red pads or by damp mopping. When damp mopping, change water when visibly soiled.

CLEAN floor as recommended above. Burnish floor as needed to restore polished look. Dust mop after burnishing.

BURNISH using a natural fiber or synthetic pad. If burnisher is equipped with a dust control system, dust mopping after burnishing can be eliminated.

If **ENTRYWAY MATTING** becomes heavily soiled, wash, extract or other appropriate cleaning method is required.

POST Wet Floor signs and use barricades when floor is undergoing maintenance.

Immediately clean up liquid spills on floors and post signs until floor is completely dry.

Immediately remove tracked in moisture from floors.

DEEP SCRUB with a blue pad using Century Maintenance Cleaner at 4-6 oz./gal.

RINSE floor after scrubbing.

A Green Cleaning Program may require the notification of facility management or vulnerable populations before commencing recoating or stripping operations.

APPLY 1-2 coats Clear Essence. Recoating frequency depends on traffic levels and quality of maintenance. Common recoat frequency is 2-4 times per year.

STRIP floor with Ultra Stripper at 1:4. Rinse after stripping.

Stripping entire facility may not be required on an annual basis. Extension of the stripping cycle is possible and depends on the quality and efficiency of the maintenance program.

APPLY up to 4 coats of Clear Essence. If additional coats are desired, wait one week before applying.

The Cutting Edge of Clean!

Don't know where to start? Multi-Clean Tools can help!

Multi-Clean offers a full line of products and learning tools to assist with the implementation of a green cleaning program. Visit www.multi-clean.com and click on **Green Link** to learn more.

Green Cleaning programs emphasize floor care as a focal point for creating cleaner and healthier facilities. That is why Multi-Clean developed the **Certified Floor Care System** that uses high performance products that are Green Seal Certified and help fulfill the goals of cleaning for health. This is great for schools, healthcare, government facilities, commercial buildings, LEED Certified facilities, and for Building Service Contractors that offer green cleaning services.

Multi-Clean is proud to be a Team Supporter of clean and healthy schools.
