

Rapid Station BIB Accessory Kit

Part #421305

Use this kit to dispense Multi-Clean branded concentrates from a 5-gallon bag-in-box container.

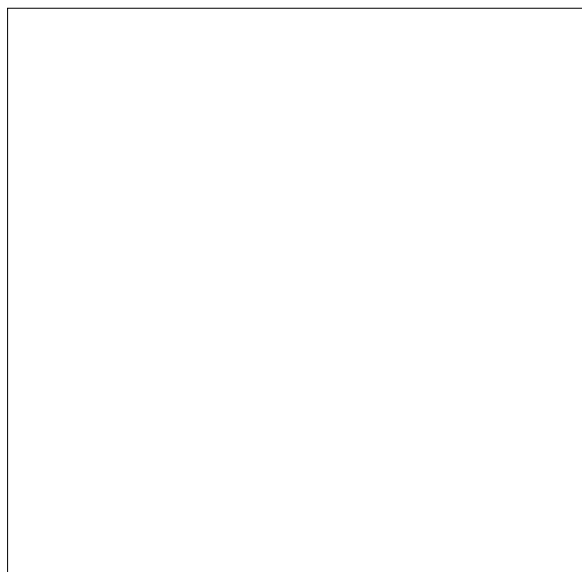

Kit Includes:

- 1 - BIB dispensing valve
- 1 - Threaded hose barb
- 1 - Directional check valve
- 1 - 8 ft. 1/4" diameter plastic hose
- 1 - Label kit
- 1 - Tip kit #421116

Instructions:

1. Set up Rapid Station
2. Select color coded metering tip from the tip chart in the instructions.
3. Screw in the tip to the water inlet.
4. Use a scissors to cut plastic tubing in half.
5. Slip one end of the plastic hose over the water inlet. Slip the other end over the gray colored check valve on the side of the directional arrow head.
6. Remove cover from BIB container and replace with BIB dispensing valve (screw on tightly).
7. Screw in black hose barb into end of valve.
8. Place another hose over hose barb, and other end over check valve.
9. BIB container must be placed on side with dispensing valve in open position.

NOTE: Light gray check valve must be oriented so that directional arrow for chemical flow is pointing toward dispenser.

Rapid Station Drum Accessory Kit

Part #421355

Use this kit to dispense Multi-Clean Branded Concentrates from a 55 gallon drum.

Kits Includes:

- 1 - 55 gallon drum cap with strain relief
- 1 - 8 ft. plastic hose 1/4" diameter
- 1 - Ceramic weight and check valve
- 1 - Tip kit
- 1 - Label kit

Instructions:

1. Set up Rapid Station.
2. Select color coded metering tip from the tip chart in the Rapid Station Instructions.
3. Screw in the tip to the water inlet.
4. Slip open end of plastic hose over water inlet.
5. Feed other end of hose with ceramic weight into drum of product. Be sure hose is fed to the bottom of the drum. Screw on the special cap.
6. Prime the Rapid Station as described in the instructions.
