

# Take Charge II

## Carpet Anti-Stat and Static Dissipative Floor Cleaner

### Carpet Anti-Static Treatment

**TAKE CHARGE II** effectively eliminates nuisance static shocks originating from carpeting. A single application can last up to 3 months under normal conditions. Low humidity situations may require more frequent applications.

TAKE CHARGE II contains special cationic agents that help prevent static charge build-ups. Apply TAKE CHARGE II to carpets through a low pressure sprayer or lightly mist with a trigger sprayer. The carpet should be allowed to dry 1-2 hours before allowing traffic.

*Note: The product is not recommended for use on 'fifth generation' stain resistant carpeting.*

### Static Dissipative Floor Cleaner

TAKE CHARGE II is part of the Multi-Stat ESD Control Floor Program. It is used as a weekly cleaner on floors protected with Multi-Stat Static Dissipative Floor Finish.

TAKE CHARGE II effectively cleans without harming the static dissipative properties of the floor. Recommended method is light damp mopping 1-2 times per week with TAKE CHARGE II diluted 8 oz./gallon (1:16).

TAKE CHARGE II can also be used on hard floors protected with conventional floor finishes. The product will not cause dulling, and can help reduce nuisance shocks on hard floors.

Carpet Anti-Stat and Static Dissipative Floor Cleaner

### Properties

Appearance .....	Clear, red/pink low viscosity liquid, pleasant odor
pH .....	7.2
