Your Guide to Clean

Dust Fast

Dust Mop Treatment

- Efficient Dust Mopping
- Easy to Keep Dust Mops Clean
- Use on All Types of Floors

Dust Fast

Dust Mop Treatment

DUST FAST is a liquid dust mop treatment, formulated with mineral seal oil and special additives designed to increase dust mop performance. It is safe for all floors which have been properly treated. DUST FAST is characterized by its highly efficient dirt pickup, slow controlled evaporation, built-in mop launderability, very light pleasant odor, and high flash point (WILL NOT CAUSE SPONTANEOUS COMBUSTION)

Efficient Dust Mopping

DUST FAST when properly applied to a dust mop, will pick up the free dust and hold it in the strands of the mop. There is no longer a need for sweeping compound. Finished floors take on a new look - cleaner surface plus higher lustre.

Easy to Keep Dust Mops Clean

DUST FAST is also formulated with a special built-in detergent to provide good mop launderability. Now it is easy to have clean mops.

Use on All Types of Floors

DUST FAST can be used on all floors properly sealed or treated with wax or a resinous finish. It can be used on some untreated floors such as wood and concrete. **CAUTION:** DUST FAST should never be used on linoleum, rubber or asphalt tile floors unless they have been properly sealed or waxed.

Directions

1. Apply evenly 1-1 1/2 oz to each 12 inches of mop length. (Note: When applying by spray method, avoid breathing of spray mist.)
2. Place mop in plastic bag or sealed container for approx. 3-4 hours before using.
3. After use, shake mop thoroughly to remove dust, lint and foreign material or clean mops by laundering.
