

Cohesion,..definision: A group or team that works together in close harmony.

No Time to Burnish, No Time to Strip, NO PROBLEM!
Today's labor shortage realities is forcing cleaning and maintenance staff to look for ways to eliminate labor intensive floor care processes.

Find more details in this newsletter about a cohesive system of products, tools, and processes that produce great looking floors with a lot less maintenance.

Read on our blog: "Saving Labor on Floor Care Processes starts with eliminating burnishing and stripping"

Cohesion FLOOR CARE SYSTEM

Introducing the Cohesion Floor Care System

- No Burnishing
- No Stripping
- Great Looking Floors

Easy 3-Product System

- Cohesion Floor Coating
- Cohesion SBR Clean & Polish
- Cohesion Intensity Recoat Prep

[Click Here](#)

Cohesion Floor Coating

- High Gloss
- Self Polishing
- Exceptional Durability
- Extreme black mark resistance

What Makes it Different

Finishes designed for high speed burnishing are inherently softer, scuff easier, absorb more dirt and take more black marks. If these finishes are not regularly burnished, appearance deteriorates. Cohesion Floor Coating was not designed for burnishing and offers superior scuff, mark and soil resistance. Cohesion Floor Coating is optimized for regular scrubbing with Clean & Polish pads to gradually improve and maintain gloss.

New for Distributors

Pallet pricing: Order a full pallet (36 count) Cohesion Floor Coating 2x5 gallon cases and get a 10% discount.

Cohesion 8 SBR Clean & Polish

- Concentrated, use at 1 oz/gal
- Convenient Squeeze & Pour Packaging
- Same package also works in a dispenser
- Great lavender fragrance

What makes it different

Cohesion 8 SBR is an effective surface cleaner that contains a unique wax grafted detergent that creates a polishing effect when used with auto scrubbers equipped with the correct clean & polish pads.

Cohesion 9 Intensity Recoat Prep

- Concentrated, use at 2 oz/gal
- Aggressively helps remove embedded dirt
- Helps take off top coats of old finish
- Works best with Maroon SPP or EPP Pads

Designed for aggressive cleaning and surface stripping dirt embedded finish when used with a scrubber equipped with a Surface Prep Pad (SPP by 3M) or Ecoprep Pad (EPP by Americo). Use with automatic scrubbers, low speed floor machines, and orbital floor machines.

What makes it different

Cohesion 9 Intensity as it's name implies is a strong cleaner. Using it straight or at too strong a dilution, it becomes a stripper. Using it as intended, the product works synergistically with SPP or EPP pads to strip of 2-4 coats of finish to leave a sound base to apply additional coats.
